

REACH: Main obligations of companies in the plastics sector

If you are in the plastics sector, you also have obligations to comply correctly with the REACH Regulation. With this course you will be able to know what they are and thus be able to meet the requests of your customers and know what to ask your suppliers, while you will be sure that you are complying correctly with this legislation. Clarify all your doubts about its degree of affection. Latest news!

Currently, certifications of recycled plastic materials such as RecyClass require analysis of certain REACH substances. This directly affects recycling companies, since they must perform these analyses as a mandatory requirement to obtain this certification. In this course this aspect will be discussed, mentioning the necessary analyses and their importance.

Mª Belén Monje Martínez

Personal investigador de AIMPLAS /
AIMPLAS Researcher

Metodología

- Methodology
- A webinar is an online conference that is transmitted On-line, where attendees can watch from their computer everything that the teacher is showing on the screen and listen to his explanations. Webinars are given in real time, with a specific date and time, and their main characteristic is the interactivity between the teacher and the attendees.
- The assistant will need a computer with sound and internet connection to be able to interact with the teacher by chat.
- The aim of the webinar is to establish an interactive way of communication where the teacher receives feedback from the attendees who are listening.
