

How to implement in my company the legislation on plastics in contact with food

★★★★★ (8) asistentes

The food safety of plastic materials and objects intended to come into contact with food plays a decisive role in their marketing. This is why it is essential to know the fundamental aspects for the interpretation and application of the legislation on plastics in contact with food.

AIMPLAS Researcher

Metodología

- > A webinar is an online web-based meeting where participants can see what speakers display in their screens and listen to their explanations. Webinars are made in real time and on a specific date and hour and their main characteristic is interactivity between the teacher and the attendees. Attendees only need a computer with active audio and Internet connection to interact with the teacher by using the chat.
